J4 RTS

Universal radio motor for external Venetian blinds

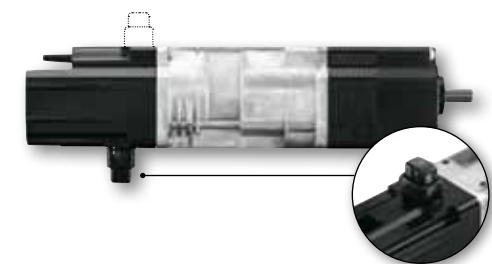

Now, the shortest motor on the market has integrated radio technology. This changes everything, except the size!

SOMFY EXCLUSIVE FEATURES that make the difference

> **For you**

The mushroom control, adjustable up-down/left-right:

- Greater flexibility both for integration and installation.
- Always accessible for a double power cut.
- Motor always protected in case of an incorrect installation.

Direction of rotation reversed from remote control:

- Easy to do from the remote without accessing the motor.

> **For your customers**

The Modulis function:

- Intuitive, accurate slat angle setting via the thumbwheel on the remote control.
- To adjust natural light or enhance their privacy.

The «my» function:

- By default preprogrammed in the lower position with the slats at an angle. Easy to modify by the user.

New J4 RTS. Integrated radio technology ...

... **Make a difference** in all your residential and commercial buildings

With its built-in radio receiver, the J4 RTS still manages to remain the smallest on the market.

254 mm

For the first time, Somfy has integrated a RTS radio receiver into the motor drive for its external Venetian blinds. It changes everything for you.

It makes you more competitive, because productivity is improved from integration through to installation.

> **Your working practices are respected**

J4 RTS incorporates the ergonomic standards of the External Venetian Blind market. The adjustment process for end limits is the same in the workshop or on site.

> **Productivity for integration**

- **One product to be integrated:**
no radio module to be added (built-in radio receiver), with quick connections to speed up your procedure even more.
- **Factory presets applied.**
- **No specific training for operators.**

> **Quick to install**

- **Automatic mode:**
once connected to the mains, the J4 RTS automatically runs a cycle to detect the upper end limit and...that's all you have to do, the setting is complete.
- **Easy to adjust:**
settings are done by remote control, using the same layout for all the external Venetian blind motors on the market.

J4 RTS, from 6 to 18 Nm, with all the benefits of radio.

- Range: 6/24 – 10/24 – 18/24
- Min length 6 Nm: 306 mm with accessories
- Compatible with all types of head boxes
- Detachable cable
- 2-way mushroom switch (up or down)
- Working position programmable
- «my» function
- Adjustable, up/down end limits
- Remote controlled adjustments
- Auto-setting of upper end limit
- Detection of motor jamming
- Adjusting direction of rotation
- Works with all RTS equipment

Give added value on all your projects.

Add an extra dimension to your product range with the J4 RTS.

- > You will stand out by offering motor-drive and automatic control solutions for all external Venetian blinds fitted on new or renovated buildings.
- > Your solutions will benefit by including all the exclusive functions and greater comfort offered by Somfy's secure radio technology.

Let your customers set their own temperature and light comfort levels.

- > **With the J4 RTS, your customers can get the best from their external Venetian blinds**
 - **Visual comfort:**
altering the natural light level, to suit the needs of the moment, or to create the desired ambience.
 - **Thermal protection:**
maintaining a pleasant temperature all year round.
 - **Protecting privacy:**
precise adjustment of the slats to provide the required light level while avoiding intrusive glances.

> **Manual mode: simple to use Telis Modulis RTS**

- One control to manage several EVBs.
- A thumb-wheel to tilt the slats to the favorite position (intuitive operation).
- Eliminates glare on computer or TV screen.
- One-click application on the «my» button for your favorite position.

> **In automatic mode with sun and wind sensors: control the level of sunlight and protection for external Venetian blinds**

- The blind moves into place as soon as the level of sunlight reaches a preset limit, even when there is no-one in the room.
- It protects the interior from the sun.
- If the wind is strong, the wind sensor controls the raising of the blind to protect it.
- There are three optional settings for when the sunlight is fading.

> **Energy savings in summer**

- The sun's rays cannot pass through the slats.
- The interior remains cool.
- Less energy is required for air-conditioning in one room or throughout the house.

Your customers retain control of the automatic systems

When the automatic sunlight control system is activated, a manual command from the remote control or a pre-set command always take priority.

Motorised external Venetian blinds: a long-term investment for your clients, good to look at, upgradable.

> **Motorisation and automatism protect their investment**

The motor operates the external Venetian blinds smoothly, so the mechanism lasts much longer. If the wind is strong, the wind sensor raises the blinds to protect them.

> **Façades always look neat and tidy, with centralised control of the blinds**

The external Venetian blinds are always kept perfectly aligned by the centralised control system.

> **The radio technology means that the installation can always be upgraded**

The Somfy Radio Technology® system guarantees that the Venetian blinds can operate in conjunction with other motorised RTS equipment. It is therefore easy to add a motorised garage door or gate to the installation, or even outdoor lighting for the building or the garden.

Somfy Radio Technology®

RTS is Somfy's exclusive radio control system, for all the Somfy motorised products in the house. Installed in more than 10 million buildings around the world, Somfy Radio Technology® has become the absolute reference standard for secure home radio remote controls, in either new-build or renovated houses.

Somfy reliability

All Somfy products are tested in production. Somfy guarantees its products for 5 years for its customers, whether installers or manufacturers.

CUSTOMISE YOUR INSTALLATION WITH THE TELIS MODULIS RANGE AND RTS AUTOMATISMS

Telis Soliris Modulis RTS

- The 1st remote control with a thumb-wheel for adjusting the EVB slats.
- Automatic management of sunlight or wind and sun.
- Intuitive, accurate adjustment of slats, depending on the direction of the sun.
- Automatic raising if the wind is strong.
- User can take over control of the automatic system at any time without deactivating it.
- 3 finishes: Pure, Silver, Lounge

Telis 1 Modulis RTS, Telis 4 Modulis RTS

- 1 channel remote control, or 4+1 channels for centralised control of EVBs.
